PROFESSIONAL EXPERIENCE

Dapen bank bjb - Networking, IT Infrastructure

Bandung, Mei 2025 - Present

In my role at Dapen Bank BJB, I was responsible for ensuring the stability and security of the organization's IT infrastructure. My main tasks included:

- Monitored primary servers and Disaster Recovery Center (DRC) to ensure high availability and performance.
- Administered and maintained Palo Alto firewall systems for secure network access and threat prevention.
- Managed virtual machines (VMs) on VMware ESXi, including deployment, monitoring, and troubleshooting.
- Provided end-user support by managing and maintaining employee work devices (laptops, desktops, etc.).
- Maintained and updated the official website and internal applications of Dapen bank bjb.
- Administered Active Directory for user account management, group policies, and access controls.
- Managed DHCP Server to ensure proper IP address allocation and network connectivity.
- Collaborated with internal teams to ensure IT systems aligned with organizational goals and compliance standards.

PT. Sinergi Prakarsa Utama - Networking & IT Infrastructure

Tangerang, January 2025 - Mei 2025

In my current role at PT. Sinergi Prakarsa Utama, I am responsible for managing and optimizing the company's server infrastructure and databases. overseeing server operations, troubleshooting technical issues, and ensuring data security.

- Managed co-location servers to ensure optimal performance and data security.
- Monitored server operations and performed routine maintenance to ensure normal functioning.
- Troubleshot on-premise client servers using VM ESXi, resolving various technical issues.
- Administered and optimized PostgreSQL and MySQL databases.
- Provided technical support and training to end-users to maximize system efficiency.
- Implemented security solutions to protect systems from cyber threats.

PT. Nagatech Sistem Integrator - Supervisor Network Engineering

Bandung, March 2021 - August 2024

As a Network Engineering Supervisor at PT Nagatech System Integrator, I oversee the management of cloud servers, including Amazon Web Services, Google Cloud Platform, and Alibaba Cloud. Additionally, I ensure the seamless operation of network infrastructure at our clients factories and supermarkets

- I manage Ubuntu-based servers, configure Apache web servers with Node.js backends, oversee various PHP programs, and ensure all server configurations and security measures are properly implemented.

- I design and implement network infrastructure for factories and supermarkets, ensuring the seamless operation of our programs.
- I mentor fellow network team members and hold responsibility for the overall performance of the network division.
- I ensure all programs function smoothly and are accessible to clients across various regions. Additionally, I conduct daily backups for SQL and MongoDB databases.

Myrobo - Robotic Mentor & UI/UX Design

Bandung, *agustus 2019 - March 2020*

I teach an extracurricular robotics program, focusing on line follower robots for middle and high school students. Additionally, I contribute to the redesign of the MyRobo website.

Kelurahan Lebak Gede - UI/UX Design

Bandung, *agustus 2018 - agustus 2018*

Developed a sophisticated website to broadcast community announcements, showcase documentation of diverse events, and provide interactive features such as message delivery, ID card registration, and family card applications.
